## Corporate Statement

### RE: Important Announcement Regarding Discontinuation of Certain p.a.w.s.® Antimicrobial Hand Wipes Packaging

At Safetec of America, we are committed to providing you with high-quality infection control, O.T.C., and first aid products. As part of our ongoing efforts to streamline our product offerings and better serve our customers, **we have decided to discontinue the 34405 50 ct. canister and 34410 160 ct. canister versions of our p.a.w.s.® Antimicrobial Hand Wipes.**

Once our current inventory runs out, we will no longer be manufacturing this particular style. **However, we assure you that the individual towelettes packed in the 100 ct. carton (34400) and individual bulk towelettes (34400B) will continue to be available for purchase.** These alternatives provide the same trusted formula and effectiveness that you have come to expect from Safetec of America.

We understand that change can sometimes be inconvenient, and we apologize for any disruption this may cause.

If you have any questions or concerns regarding this discontinuation or if you would like assistance in transitioning to alternative packaging options, please do not hesitate to contact your account manager or our customer service team- 1-800-456-7077 or [sales@safetec.com](mailto:sales@safetec.com).

Thank you for your continued trust and partnership!
