Corporate Statement

RE: REACH, SvHC, and RoHS Compliance for Safetec of America Products

Safetec of America confirms that our products are manufactured in accordance with the REACH Regulation (EC) 1907/2006 and the EU Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU, including its amendment Directive 2015/863/EU.

The components of our products are classified as “articles” under REACH, and their production does not involve the use or supply of “substances” or “preparations,” nor does it involve the intentional release of substances. As such, there is no requirement for registration or pre-registration under REACH.

Along with our suppliers, we actively monitor the inclusion of Substances of Very High Concern (SvHC) as published by the European Chemicals Agency (ECHA). Based on the latest information available, our products do not contain SvHCs above the threshold levels established by REACH. This assessment is ongoing to ensure continued compliance as ECHA updates the Candidate List of SvHCs.

Additionally, our products are not electrical nor electronic components and do not contain substances restricted by the RoHS directive. Therefore, they fall outside the scope of RoHS requirements.

Safetec and our suppliers are committed to maintaining compliance with applicable REACH and RoHS regulations.

Safetec of America, Inc.
