Safetec of America Inc.

Hello! Welcome to Safetec, where we take pride in offering top-quality infection control, first aid, over-the-counter (OTC), and compliance products. Established in 1992, we have over 30 years of experience in manufacturing. We've made it our mission to uphold the highest quality standards, which is why we strive to be compliant with FDA and EPA regulations and maintain a UL cGMP Certification*. Our diverse product line serves a variety of industries, providing solutions to minimize the risks of cross-contamination and meet safety guidelines, like OSHA and ANSI standards. We are committed to this mission, and we invite you to join us on this journey.

Based in Buffalo, N.Y., we operate three facilities where we oversee every aspect of manufacturing, from concept to product development through distribution. We employ over 120 dedicated professionals in the United States who work tirelessly to manufacture quality products. Whether you're seeking detailed information on our products or need a partner to bring your product to life, we are here to support you every step of the way.

At Safetec, our motto is simple:
One Team, One Goal. Customer Driven.

Red Z® and Green-Z®

Fluid Control Solidifiers

Safetec's Red Z® and Green-Z® solidifiers embody our safety commitment, swiftly containing and solidifying hazardous* spills into a semi-solid (gel) mass. Red Z® handles blood and body fluids, while Green-Z® performs identical functions in addition to chemical spills because there is no chlorine. These solidifiers are user-friendly, eco-conscious, and trusted across industries, and they ensure exceptional performance and regulatory compliance. Available in single & multi-use bottles, single-use pouches, drop-in pacs, and buckets.

- Contains super absorbent polymers (SAPs)
- Eliminates splashing and aerosolization
- Easy-to-use
- Fast-acting
- For potentially infectious blood, body fluid, or chemical spills.***
- Helps comply with DOT regulations†
- Shelf-stable in a cool, dry place**

Deodorizes ***Chlorine-Free***

***Products are shelf-stable and do not require an expiration date. For the product to remain shelf-stable, it must be kept in a cool, dry place and in its original packaging. If contents are hard/compact, shake the product to loosen before use.*

**** Careful consideration should be given to chemical spill cleanup, i.e., room size, temperature, quantity and concentration(s) of the solution(s).*

**Dispose of potentially infectious materials in accordance with all local, state and federal regulations.*

Zorb Sheets

Blood, Body, & Chemical Fluid Absorbents

Transfer specimens safely and easily using Safetec's Zorb Sheets! These versatile sheets help reduce compliance risks associated with the handling and shipping of diagnostic specimens, infectious substances, hazardous materials and dangerous goods. The tissue-based material allows fluid to immediately activate the superabsorbent polymers to solidify and transform the contents into a semi-solid (gel) mass. Safetec's Zorb Sheets—your reliable choice for safe transportation that helps comply with DOT, CDC, OSHA, IATA, ICAO, USPS, and UN regulations.†

Universal Precaution Compliance Kit ... 13 & 20

5 Steps *to Efficiently Contain and Remove Bloodborne Pathogen Spills*

29 CFR 1910.1030 – Bloodborne Pathogens

Universal Precautions is an approach to infection control. According to the concept of Universal Precautions, all human blood and certain human body fluids are treated as if known to be infectious for HIV, HBV, and other bloodborne pathogens.

Step 1: Prevent

To prevent direct contact with the spill during the cleanup process and minimize the risk of infection, disposable protective clothing must be worn. This includes gloves, combo mask/safety shield, and a protective apron.

Step 2: Contain & Remove

To efficiently contain and remove the spill, a ***solidifying agent*** (Safetec Red Z®) and a ***scoop/scraper*** are to be used. The spill contents are to be disposed of into a ***red biohazard bag***.

Step 3: Disinfect

To properly disinfect the contaminated surface area, use a ***surface disinfectant wipe*** (SaniZide Pro 1®). This step is critical for preventing further contamination.

Step 4: Dispose

Discard the germicidal wipe, gloves, safety shield and apron into the ***red biohazard bag*** and dispose of it according to local, state, and federal regulations.

Step 5: Sanitize

Use an ***antimicrobial hand wipe*** (p.a.w.s.®) to sanitize hands, then use ***soap*** (SaniWash®) and water once the spill is contained and cleaned.

Helpful Tips to Remain OSHA Compliant

- Think safety culture - not just compliance
- Compliance is the key to prevention
- Do not guess information or make assumptions
- Plan and prepare for an inspection ahead of time

Protect against exposure to bloodborne pathogens.

29 CFR 1910.1030 – Bloodborne Pathogens

Universal Precautions is an approach to infection control. According to the concept of Universal Precautions, all human blood and certain human body fluids are treated as if known to be infectious for HIV, HBV, and other bloodborne pathogens.

Following OSHA 29 CFR 1910.1030 is vital for protecting employees from serious health risks, ensuring legal compliance, fostering a safe work environment, and minimizing financial and legal liabilities for employers.

Under this compliance standard, when there is occupational exposure to blood and body fluids, employers are required to provide appropriate, readily accessible personal protective equipment (PPE) at no cost to employees. This PPE must prevent blood or other infectious materials from reaching employees' skin, clothes, eyes, mouth, or mucous membranes during normal use. Contaminated work surfaces must be decontaminated with an appropriate disinfectant after a spill cleanup. Additionally, a means to sanitize hands and other skin must be available, such as antiseptic wipes and soap.

Adhering to these standards not only promotes workplace safety but also helps prevent the transmission of infectious diseases.

With just one kit, the Universal Precaution Kit can help you remain compliant with the OSHA 29 CFR 1910.1030 Bloodborne Pathogens Standard.

Safetec can help!

Universal Precaution Compliance Kit

This kit is crucial due to the health risks associated with bloodborne pathogens like HBV, HCV, and HIV. It adheres to OSHA, CDC, and State Health Department standards, providing the necessary personal protection and cleanup tools.

Suitable for various workplaces, such as nursing homes, hospitals, schools, correctional facilities, and any business where job-related contact with blood is a potential risk.

This kit includes Red Z® Solidifier, a quick and efficient solution for solidifying blood and body fluids while eliminating odors.

ANSI is the American National Standards Institute and sets guidelines to ensure products and services in the U.S. are safe, reliable, and of high quality. ANSI doesn't make the standards themselves but coordinates the efforts of different groups and companies to develop them. The standards help with consistency and ensure everything works well together, promoting safety and efficiency in various fields.

At Safetec, we manufacture a variety of products that comply with ANSI standards to ensure workplace safety. Our antibiotic ointments, antiseptic, burn treatment, and hand sanitizer lines meet the requirements set by ANSI.

OSHA 29 CFR 1910.151(b)

OSHA's 29 Code of Federal Regulations (CFR) 1910.151(b) requires that "Adequate first aid supplies shall be readily available." This rule applies to treatment of minor injuries that occur in the workplace. OSHA refers employers to ANSI Z308.1-2021 for guidance on minimum requirements for first aid kits.

ANSI / ISEA Z308.1-2021

American National Standard Minimum Requirements for Workplace First Aid Kits and Supplies Z308.1-2021 establishes minimum performance requirements for first aid kits and their supplies that are intended for use in various work environments. Classification of first aid kits, designating the assortment of items and quantity of each item, is based on the anticipated number of users intended to be served by each first aid kit, as well as the complexity of the work environment and level of hazards.
