Bonding Cement

Natural Rubber Latex Adhesive

Torbot® Bonding Cement is a high-strength natural rubber latex adhesive designed to create a strong, dependable bond between two surfaces.

Trusted for decades in prosthetic, specialty medical, veterinary, and ostomy applications, Torbot®'s Bonding Cement provides reliable adhesion when secure attachment is essential. The convenient 4 oz. brush-top can allows for controlled application in a variety of specialty bonding applications.

Ideal for use in:

- Hair Systems and Wigs
- Ostomy Appliance Adhesion
- Prosthetic Attachment
- Specialty Medical Device Attachment
- Specialty Research and Attachment Applications
- Theatrical Prosthetics and Special Effects Applications
- Veterinary Applications
