Spray

Tincture of Benzoin

Adhesive Skin Barrier / First Aid & Skin Protectant

Torbot® Tincture of Benzoin is a traditional skin protectant and skin preparation solution trusted by healthcare professionals for decades. Available in a 4 oz. bottle with dauber for targeted application or a 4 oz. spray for broader coverage, it helps protect the skin while preparing it for dressings, medical tape, and other medical applications. The fast-drying formula creates a temporary tack that quickly dissipates while leaving behind a protective coating, making it a versatile solution for first aid, wound care, and veterinary applications.

Ideal for use in:

- Blister Protection
- Dressing Preparation
- First Aid
- Medical Tape
- Surgical Skin Preparation
- Veterinary Care
- Wound Care
